

ODS

ITI-ODS-SW

Operational Debrief System

ITI's Operational Debrief System (ODS) is a fully integrated video and audio playback, archiving, and debrief system. The ODS is used to download and playback aircraft video and event data that has been recorded on a Video Data Cartridge or Advanced Data Transfer Cartridge. The recorded data is downloaded from the data cartridge onto an ODS workstation using a Cartridge Interface Device (CID) where the user can then review automated synchronous video displays, aircraft positioning and state 3D rendering, while featuring tabular display of aircraft state data, relative aircraft state information, and display of aircraft events.

Updated for modern use, the ITI ODS serves as a WIN10 plug and play replacement for the original GE Aviation ODS.

In addition to the original features of the tabular display, the ITI ODS offers event tracking, as well as the ability to scroll forwards and backwards in a mission.

The ITI ODS utilizes 3D satellite imagery as the foundation of its updated mission visualization capability creating a realistic debrief experience for operators who record Time, Space, Position Information (TSPI).

ODS

ITI-ODS-SW

Operational Debrief System

When partnered with the ITI GigaCID, the ODS functions as a comprehensive debrief unit for an individual pilot or entire squadron. With the capability to view multiple pilots positions in real time, the ODS allows post-mission breakdown of a squadron's flight movements and the capability to breakdown major milestones for further analysis.

Key Features	Ordering Information	
<ul style="list-style-type: none"> • WIN10 Compatible • Enhanced 3D satellite imagery • Scalable for debriefing multiple aircraft or an entire squadron • Fastest download/debrief available • Tabular display for comprehensive review • Scroll forward/backward capability 	Part Number	Description
	ITI-ODS-SW Alternate GE P/N: GSS-UM1500	Video and Audio Playback Software
	ITI-ODS-MAINT-1YR	Comprehensive maintenance coverage for 1 year
	Cage Code	3EEM8
